

**Soybean Rust Identification Short Course Registration**

**Date:** September 21-23, 2010 (welcome dinner September 21<sup>st</sup>)

**Focus:** This Short Course has been designed with the agricultural specialist or consultant in mind; the intended audience includes soybean professionals from across the country. As such, we will concentrate on hands-on identification of the disease on the plant. We will also talk about scouting techniques and demonstrate methods we use to maximize our chances of finding the signs of this pathogen in the field. There will be a section concerning field trials at the research station as well.

**Registration:** FREE. Course participants will be provided with a 20X hand lens, disposable gloves, sanitizing stations, relevant publications and training packet, and meals during the course. Dinner will be provided the evening preceding the course and the next night, and lunches will be provided both days of the course.

Please print this page, fill it out, and <b>FAX</b> it to Carrie Harmon at (352) 392-6532.	All fields are mandatory; we will not make this information available to any other agency or use it for any purpose that is not associated with this short course.
You may also copy the following section and paste it into an email message and <b>EMAIL</b> it to <a href="mailto:fdc@ifas.ufl.edu">fdc@ifas.ufl.edu</a> .	Registering a group? Feel free to develop an Excel spreadsheet with the following information and email that to <a href="mailto:fdc@ifas.ufl.edu">fdc@ifas.ufl.edu</a> .

Primary Crop Responsibility \_\_\_\_\_

Do you plan to attend the fish fry dinner September 21<sup>st</sup>?      Yes      No      (Circle one)

\*We request an emergency phone number in case of last-minute delays or problems due to hurricanes, etc. Our 2005 course took place immediately following the departure of Hurricane Dennis from the Florida panhandle. Although we do not foresee this happening again this year, we prefer to be prepared.
